About Segimed

Surgitools has been developingproducing and marketing innovative products for healthcare professionals in minimally invasive surgery. We offer diverse portfolio of high-quality devices, cost-saving supplies and excellent services.Surgitools has evolved to be a leading MS solution provider of innovative surgical products worldwide.

Our mission is to help medical professionals around the world to improve the quality of healthcare by developing. manufacturingand marketing innovative,quality medical products. People at Surgitools continuously focus on the safety of patients and the effectiveness of products and servicesand emphasize on customer satisfaction.

We strive to build a sustainably growing enterprise by pursuing excellence and exceeding our customers'expectation in all aspects.

Product Series

- **Laparoscopic Consumables**
 - Disposable Laparoscopic Scissors
 - Disposable Laparoscopic Graspers
 - Disposable Laparoscopic Dissectors
 - Disposable Retrieval Bags
 - Disposable Specimen Pouches
 - Disposable Retrieval Bags with Memory Wire
 - Disposable Redeployable Ripstop Retrieval Bags
 - Disposable Ripstop Retrieval Bags
 - Disposable Knot Pusher
 - Disposable Trocar
- **Anti-infection Consumables**
 - Disposable Ultrasound Probe Cover
 - Disposable Wound Protector
 - Disposable Endo Covers
- **Other Consumables**
 - Disposable Skin Retractors
 - Disposable Uterine Cannula

Precision mold manufacturing to ensure the high quality products.

Disposable Laparoscopic Instruments

Sugritools laparoscopic handheld instruments consist of linkless, stainless steel drive

mechanism which delivers more precise " hand-to-hand " operation

Segimed

Features and Benefits

Large jaw aperture for greater flexibility

Ergonomic design for superior feel

Easily maneuverable, 360°degree rotation knob

Extended insulation to prevent stray currents

Disposable Laparoscopic Instruments

Scissors (Purple Knob)	Tip Style	REF.NO.	Description
		LES1440	Short Curved Metzenbaum, Extended Insulation, 5mmx330mm
		LES1450	Curved Metzenbaum, Extended Insulation, 5mm x 330mm
		LES1460	Curved Metzenbaum, Extended Insulation, 5mm x 430mm
		LES1480	Straight Metzenbaum, Extended Insulation, 5mmx330mm
Graspers (Green knob, with Ratchet)			
		LEG 1510	Maryland, 5mm x 330mm
		LEG 1520	Fenestrated (Duckbill), 5mm x 330mm
		LEG 1530	Fenestrated (Long), 5mm x 330mm
		LEG 1540	Fenestrated, 5mm x 330mm
		LEG 1550	Tapered (Dolphin), 5mm x 330mm
		LEG 1560	Babcock, 5mm x 330mm
		LEG 1570	Fenestrated Babcock , 5mm x 330mm
		LEG 1580	Meeker Grasper, 5mm x 330mm
		LEG 1590	Allis Grasper, 5mm x 330mm
Dissectors (Blue knob Non-ratcheting)			
		LED 1510	Maryland, 5mm x 330mm
		LED 1520	Fenestrated (Duckbill), 5mm x 330mm
		LED 1530	Fenestrated (Long), 5mm x 330mm
		LED 1540	Fenestrated, 5mm x 330mm
		LED 1550	Tapered (Dolphin), 5mm x 330mm
		LED 1560	Babcock Grasper, 5mm x 330mm
		LED 1570	Fenestrated Babcock, 5mm x 330mm
		LED 1580	Meeker Grasper, 5mm x 330mm
		LED 1590	Allis Grasper, 5mm x 330mm

Disposable Retrieval Bags

Multi-size, Reinforced, Leak Proof

Segimed

Disposable Retrieval Bags

Disposable Retrieval Bags is one of the most economical retrieval system available in the current laparoscopy market.

The product with function of deployed automatically, easy to remove and unload during procedures.

Features and Benefits

Auto retrieval with different sizes

TPU bags for superior durability

No breaks and leaks

Exceptional safety and security

Disposable Specimen Pouches

Simple, Cost-effective and Reliable

Segimed

Disposable Specimen Pouches

The Disposable Specimen Pouch is a simple and low-cost specimen retrieval system with superior durability.

Our pouches offer easy and safe specimen capture and removal during surgical procedures.

Features and Benefits

A variety of sizes to meet different demands

Drawstring for intra-abdominal closure

Special knot to prevent re-opening

Transparent TPU bags

Exceptional safety and security

Disposable Redeployable Ripstop Retrieval Bags

Extra Reinforced, Excellent Encapsulated, Leaf Proof

Segimed

Disposable Redeployable Ripstop Retrieval Bags

Disposable Redeployable Ripstop Retrieval Bag is made of nylon with a thermoplastic polyurethane (TPU) coating, with characteristic of tear-resistant, impervious to fluids and multiple specimens retrieval. The bags offer efficient and safe tissue removal in surgical procedures.

Features and Benefits

Redeployable bag allows for retrieval of multiple specimens in one surgery

Closure structure prevents bag from re-opening

Pre-loaded spring automatically opens bag upon deployment

Radiopaque thread allows bag to be visible in x-rays

ReRipstop Nylon with Polymer coating for leakproof performance

Disposable Knot Pusher

Leggiere, Flexible, Secure

Segimed

Disposable Knot Pusher

Disposable knot pusher is used during laparoscopic procedures to tighten surgical knots and to cut the suture. Knot pushers aid in simplify the tying of slipknots, simple and double knots, and can be used to form and manipulate the loop. The pusher offers an easy and safe specimen capture and removal during surgery.

Features and Benefits

- To prevent cross infection.
- Glass fiber provides extra resilience.
- Exceptional safety and security.
- Compact construction and easy to start.
- Available for multiple head types.

Disposable Trocar

Secure, Stable & Efficient

Segimed

Disposable Trocar

Provides an extensive portfolio of access system to meet the variety needs of minimally invasive surgery. Surgitools trocar system with advantages of fully removable seals, first entry insufflation, and an array of fixation.

Features and Benefits

- Provides all-around circumferential, atraumatic retraction.
- Minimal Penetration with Rapid Insufflation.
- Repaid desufflation and specimen removal.
- Superior Abdominal Wall Retention.
- Clear Indication of Shield Position.

Disposable Ultrasound Probe Cover

Clean, Smooth & Convenient

Segimed

Disposable Ultrasound Probe Cover

The cover allows use of the transducer in scanning and needle guided procedures for multi-purpose of ultrasound diagnose, while helping to prevent transfer of microorganisms, body fluids, and particulate material to the patient and healthcare worker during reuse of the transducer.

Features and Benefits

- Unique material blend provides enhanced acoustic clarity and increased flexibility.
- Conformal fit/shape to different types of transducer.
- Rolled Product creates a clear view for transducer installation and gel application.
- Prevent artifacts and provides natural nesting fit.

Disposable Wound Protector

Extra Protection, Extra Atraumatic Retraction, Ultimate Versatility

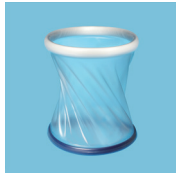

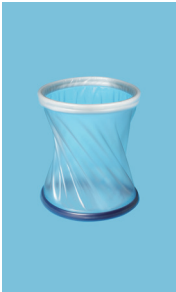

Segimed

Disposable Wound Protector

Disposable wound protector is used for soft tissue and thoracic retraction, facilitates specimen removal and instruments operation. It provides 360° atraumatic retraction and reduces superficial surgical site infection following surgeries, distributes force evenly, eliminating point trauma and associated pain.

Features and Benefits

- Adapt invasive size to facilitates rapid and effortless setup.
- Provides all-around circumferential, atraumatic retraction.
- Allows visualization of wound margins.
- Provides all-around wound protection, reduces superficial surgical site infection.
- Maximizes exposure with a minimum incision size.
- Maintains moisture at the incision site.

Disposable Endo Covers

Clean, Effective, Practical

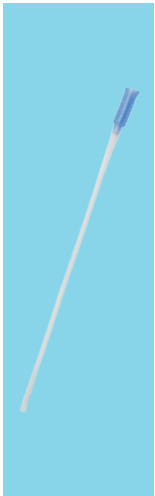

Segimed

Disposable Endo Covers

Surgitools Endo Covers is a latex-free, sterile, disposable protective covering for ENT endoscopes. The complete system provides a fast and effective method of reprocessing the endoscope and ensures an insertion tube covered with a clean cover for each procedure to against cross contamination.

Features and Benefits

- Optimal prevention against cross contamination.
- Time saving for sterilization process.
- Reduce probe down-time and save overhead cost.
- Minimizes exposure to germicides.

Disposable Skin Retractor

Visualization, Organization, Efficiency

Segimed

Disposable Skin Retractor

The Disposable Retractor system provides a great anatomical visualization for multi-type surgeries. The variety kinds of hook placements and elastic stays maintain consistent retraction. With the Surgimed Retractor, Surgeons are free to perform other tasks with greater efficiency.

Features and Benefits

- Provide a clear, unimpeded access to the surgical site.
- Increased control, support and exposure for incisions.
- Construction eliminates the risk of detachment.
- Steady Retractor maintains consistent tension throughout surgery.

	Model	Specification	Packaging

Disposable Uterine Cannula

Adjustable, Effective, Easy operation

Segimed

Disposable Uterine Cannula

Disposable Uterine Cannula provides both hydrotubation injection and uterine manipulation. The unique design allows a tight seal on the cervix and a distal extension for enhanced manipulation.

Features and Benefits

- Simple and effective
- Fully disposable and sterile packed ready for use
- Unique screw design allows better cervical seal preventing dye leakage/backflow
- Adjustable distal extension accommodates different sizes of uterus allowing uterine manipulation
- Dynamic locking mechanism for holding the tenaculum forceps
